

FIRST ANNOUNCEMENT

Dear Colleagues,

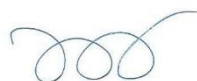

We warmly invite you to the 16th Conference of the Asian Crystallographic Association (AsCA2019) to be held at University Town, National University of Singapore, Singapore during 17-20 December, 2019 and crystallographic workshops on December 16, 2019.

AsCA2019 serves to showcase the fast developments in crystallography in this region. We are anticipating more than 400 delegates from Asian countries. This will provide a platform for those working in these areas to present their most recent research findings and to exchange ideas on frontier research topics in crystallography. AsCA2019 aims to organize a number of scientific sessions devoted to various research fields of crystallography, crystallographic workshops, flash presentations by graduate students, sessions for young faculty researchers and a 'Rising Star' session featuring young scientists. The scientific scope of AsCA2019 will cover all important aspects of crystallography-related areas, including crystal growth/crystallization, synchrotron, neutron & electron diffraction, structural biology, bioinformatics, chemical crystallography, crystal engineering, materials and polymer science, pharmaceuticals, electron microscopy, and much more.

As you might know, the first Asian Crystallographic Association conference (AsCA'92) was held in Singapore in November 1992, being organized by the late Prof. Koh Lip Lin, Department of Chemistry. Thus, AsCA comes home to Singapore after 27 years!

We heartily welcome you to Singapore to participate in this conference along with your students, postdocs colleagues, and other members. Please mark the conference dates in your calendar to be with 400+ crystallographers in Singapore! You may also consider spending Christmas holidays with your family members in Singapore!

Yours sincerely,

JJ Vittal

Chair, Local Organizing Committee
